DO NOT SCALE

Notes

This drawing shows Newton 803 Newtonite or Newton 805 Newlath to the wall sealed to Newton 601 Slimline providing a damp proofing solution to an existing slab. A loose laid membrane requires a minimum of 18mm T&G chipboard flooring.

Newton Mesh plugs should be fixed at 250 - 300mm centers.

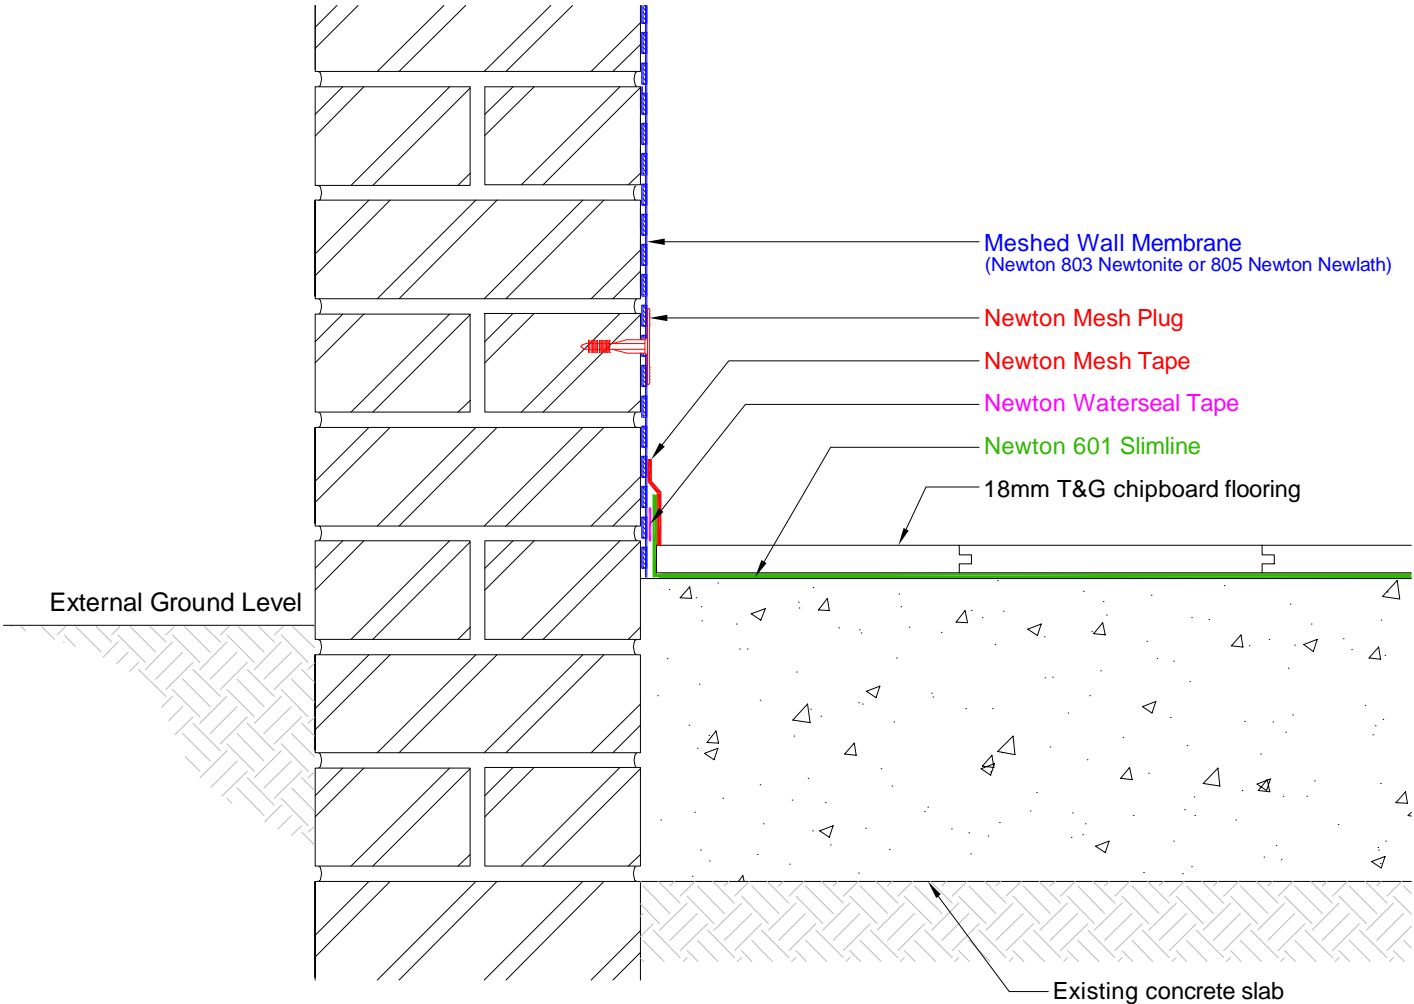

The wall membrane should be extended to just above a viable DPC or 100mm above the height of the recorded rising damp or salt band.

Please refer to plastering and rendering specifications within the installation instructions of Newton Meshed Membranes.

To access further details and relevant technical information please call our Technical Team on 01732 360095 or refer to our [website](#).

System 800 Damp Proofing

Meshed membrane linking to Newton 601 above slab with T&G finish
